Lesson 6 · Independent writing and exam technique

Name: Class: Date:

Source A

Source A: Ethiopia before and after the Health Extension Programme

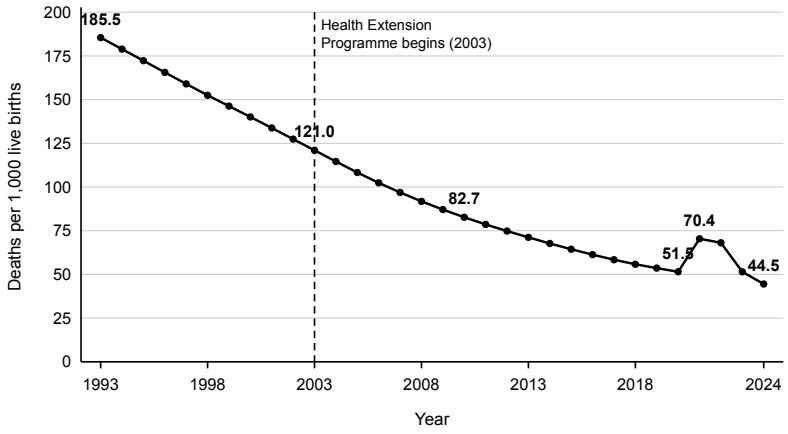

Indicator (Ethiopia)	1993	2003 (programme begins)	2010	2024
Deaths of children under 5 (per 1,000 live births)	185.5	121.0	82.7	44.5
Life expectancy at birth (years)	47.7	52.9	59.7	67.6
Children aged 1–2 vaccinated against measles (%)	22	33	64	72

Source B: Ethiopia's Health Extension Programme

In 2003, Ethiopia's Federal Ministry of Health launched the Health Extension Programme. Its aim was to improve health by taking basic health care to households in rural communities. Local women who had finished Year 10 were given one year of training and then paid as government employees. Two health extension workers were placed in each small village health post, serving 3,000 to 5,000 people. They gave vaccinations, family planning and care before and after birth, treated malaria, gave advice on nutrition and visited families at home. Within about three years, more than 35,000 workers had been trained, and by 2013 over 15,000 health posts had been built. A 2019 review counted more than 42,000 workers, but found that the programme's performance varied between regions.

Deaths of children under 5 in Ethiopia, 1993–2024

The rise in 2021 and 2022 happened during a war in northern Ethiopia (November 2020 to November 2022). Sources: World Bank (2013); Assefa et al. (2019), Globalization and Health; graph: World Bank, World Development Indicators, accessed 20 October 2026.

Evaluate (10 marks, about 18 minutes)

Evaluate how effective the Health Extension Programme has been in improving human wellbeing in Ethiopia. Use Sources A and B. Write ONE paragraph (about 150 words) that: starts with a clear judgement · supports it with at least TWO pieces of evidence from Sources A and B · includes at least ONE limitation, using *however* or *although* · ends by restating your judgement. Use your Term 3 writing skills: evaluative language, complex clause combinations, nominalisation and abstraction.

Judgement *Highly, largely, partly or not very effective? Why?*	
Evidence 1 *Data, and what it shows*	
Evidence 2 *Data, and what it shows*	
Limitation *However… / Although…*	
Final sentence *Restate your judgement*	

Self-assessment

Level	I can…	Me
Expert (A, 9–10)	make a well-reasoned judgement and sustain it from first sentence to last; use accurate evidence from BOTH sources and explain what it shows about wellbeing; weigh a significant limitation; write a cohesive, formal paragraph using all four Term 3 features purposefully.	
Proficient (B, 7–8)	make a clear judgement supported by at least two pieces of accurate evidence and a limitation; place my judgement at the start and the end; use a mostly formal register, geographical terms and at least three Term 3 features.	
Consolidating (C, 5–6)	state a judgement supported by relevant evidence, and explain the evidence OR include a limitation; write with a clear structure, some geographical terms and at least two Term 3 features.	
Developing (D, 3–4)	state a simple judgement and refer to the sources, or describe what the strategy did; write with a partial structure and some geographical terms.	
Beginning (E, 1–2)	describe the strategy or one of its results, using at least one geographical term.	

My paragraph has: □ judgement · □ evidence 1 with data · □ evidence 2 with data · □ a *however/although* limitation · □ judgement restated

Term 3 features I used: □ evaluative language · □ complex clauses · □ nominalisation · □ abstraction

My next step:

Exam timing card

Reading time 5 min (read Section IV first) · Section I multiple choice ≈ 8 min · Section II ≈ 12 min · Section III ≈ 12 min · Section IV ≈ 18 min (plan 6 · write 10 · check 2)

Sentence starters (for students who need them)

Judgement: The Health Extension Programme has been _____ effective in improving human wellbeing in Ethiopia.

Evidence 1: Since its introduction in 2003, _____ (Source A), which suggests that _____.

Evidence 2: Furthermore, _____, which shows that _____.

Limitation: However, _____, which means that _____.

Restated judgement: Overall, although _____, the programme has been _____.

largely | partly | significant | the introduction of | the reduction in | the expansion of | access to health care | wellbeing | already falling before 2003 | varied between regions
